Using Blockchain to Secure the Supply Chain

Distributed Ledgers and Logistics for Critical Goods

November 14, 2017

9am-4:30pm

Join an expert group of industry leaders, academic researchers, and government actors as we critically interrogate the potential of the blockchain to transform supply chain security.

with keynotes by

Paul Chang

Global Blockchain Industry Lead,
Distribution & Industrial Markets, IBM

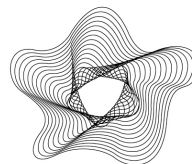

Tracy Frost

Director, U.S. Department of Defense (DoD)

Using Blockchain to Secure the Supply Chain

Distributed Ledgers and Logistics for Critical Goods

Digital economies for soft goods (software, intellectual property, digital creative content) and a globalized economy for vital hard goods (medical devices, food, critical infrastructure, precious goods) rely on complex supply chains. How might emerging blockchain technologies help make these supply chains more secure and reliable—and reshape the future of the global economy?

Speakers include

Paul Chang

Global Blockchain Industry Lead,
Distribution & Industrial Markets, IBM

Quinn DuPont

Research Associate, University of Washington,
author of *Cryptocurrencies and Blockchains*

Steve Granata

Principal Economics & Business Analyst,
MITRE Center for National Security

Mac McGary

President,
Sweetbridge

Rachel O'Dwyer

Research Fellow, Trinity College Dublin,
curator of the Openhere P2P festival

Spencer Stephens

Former Chief Technology Officer,
Sony Pictures Entertainment

Bryan Cunningham

Executive Director, Cybersecurity Policy &
Research Institute, UC Irvine

Tracy Frost

Director, U.S. Department of Defense (DoD)
Manufacturing Technology

Bill Maurer

Dean of Social Sciences & Director of the Institute for
Money, Technology & Financial Inclusion, UC Irvine

Taylor C. Nelms

Postdoctoral Researcher, UC Irvine,
Co-Editor in Chief, *Journal of Cultural Economy*

Walt Scacchi

Senior Research Scientist, Institute for Software
Research, UC Irvine

Micah Winkelspecht

CEO & Founder,
Gem
